JAVA BACKEND DEVELOPER | SPRING BOOT & MICROSERVICES

Java Backend Developer with hands-on experience building microservices and cloud-based applications using Spring Boot. Strong foundation in Core Java and data structures, with 100+ DSA problems solved. Delivers backend systems and REST APIs with a focus on clean, testable code.

KEY SKILLS & TECHNICAL PROFICIENCIES

- **Languages:** Java, Python
- **Frameworks & Libraries:** Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, JUnit 5, Mockito
- **Databases & Caching:** MySQL, Redis
- **Architecture & Messaging:** Microservices, RESTful APIs, Apache Kafka
- **Infrastructure & Tools:** Docker, Git, GitHub Actions (CI/CD), Maven, Postman, Jira, IntelliJ IDEA, VS Code

PROFESSIONAL EXPERIENCE

Diginature (Startup) | Remote
Backend Developer

Jun 2025 – Aug 2025

Designed and delivered backend systems and workflow automation for a growing startup serving 100+ users.

- Reduced a client on boarding time by **30%** - by building RESTful APIs in Spring Boot, implementing JWT authentication, and automating 3 core workflows.
- Automated deployments for 4 production services using GitHub Actions, eliminating manual release efforts and preventing deployment errors.

OnePlus | Remote
Software Quality Analyst

Jul 2024 – Dec 2024

Validated pre-release system software in 8+ device models to ensure backend stability for global roll-out.

- Found and documented **339+ critical system-level defects** 8+ device models during pre-release testing, using clear troubleshooting steps to speed up the engineering team's bug-fixing process.
- Speed up the debugging process by recording detailed API crash logs and rare failure scenarios across 8+ device models, significantly cutting down the time it took engineers to recreate each bug.

TECHNICAL PROJECTS

Lovable Clone | *Spring Boot, Spring Security, Hibernate/JPA*

2026

- Designed secure RESTful APIs (Spring Security/JWT) for a Spring Boot backend to deliver core authentication and profile features, using Hibernate/JPA and MySQL for data management.
- Ensured zero regression bugs during code refactoring by writing comprehensive unit and integration tests with JUnit 5 and Mockito, achieving over **70%+ test coverage** on authentication and core API modules.

Airbnb Backend | *Spring Boot, Microservices, Docker, Kafka*

2025

- Built a production-ready Airbnb alike backend - quantified by end-to-end API coverage across listings, bookings, payments, and reviews - by using Microservices with Spring Boot, containerizing via Docker, and persisting data with Hibernate/JPA and MySQL.
- Integrated Apache Kafka for asynchronous communication between the booking and notification services, and implemented Redis caching to optimize high-frequency listing queries.

EDUCATION

IMS Engineering College (AKTU) — Ghaziabad
B.Tech in Computer Science and Engineering — CGPA: 7.60

2026

D.A.V Public School (CBSE) — Patna
12th: 80.1% — 10th: 81.6%

2022

LEADERSHIP & CERTIFICATIONS

HackWithDelhi (May 2024): Team Lead – Runner-Up, 12-Hour National Hackathon at GL Bajaj.

Certifications: Java Full Stack Development (Udemy), Docker & Kubernetes Masterclass.
